

# MANKATO

## Transit Development Plan

### PLAN OVERVIEW

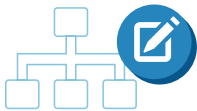

The Mankato Transit Development Plan (Mankato TDP) will provide recommendations for how Mankato's transit system can grow. The plan will evaluate and make recommendations for:

**New or improved bus routes and transit services**

**Investments in capital improvements like buses, transit hubs, and support equipment**

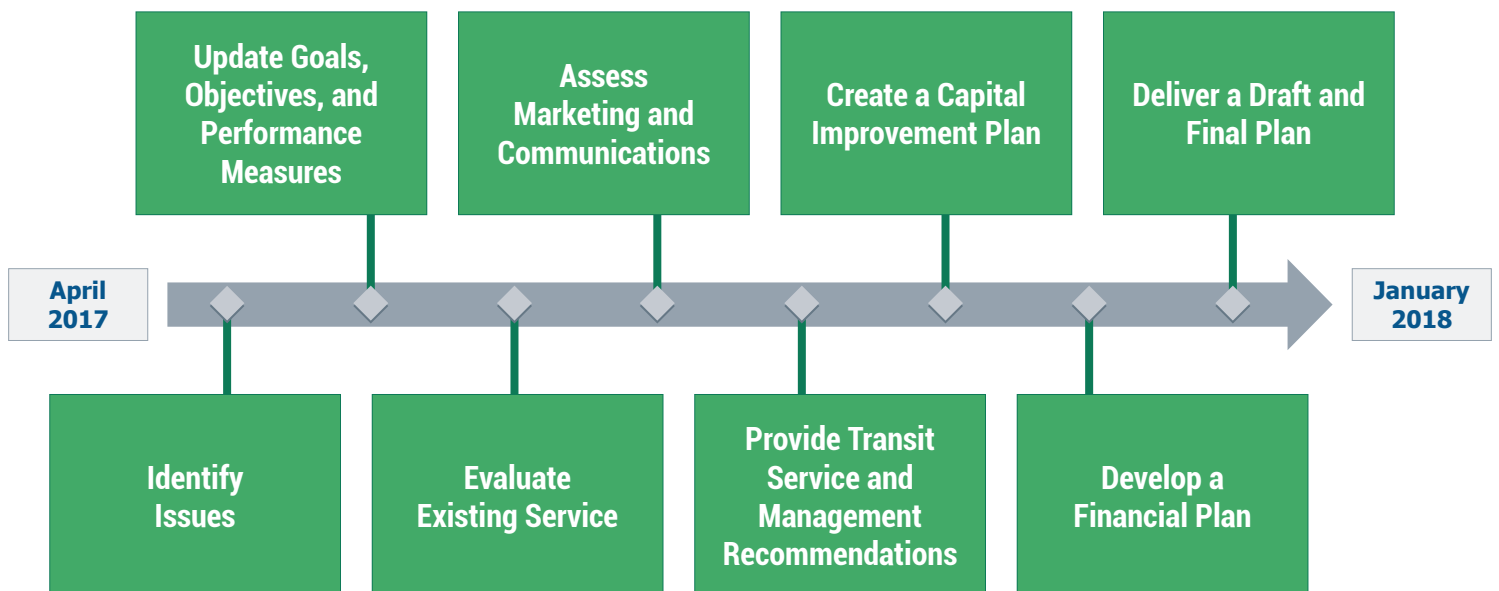

**Transit information availability and accessibility**

**Ways to fund increased and improved transit service**

The plan will also address factors that help make transit a feasible transportation option for residents and visitors, including fares, schedules, routes, and marketing.

### SCHEDULE

*As the Mankato area continues to grow, the demands on the region's transit and transportation system are changing.*

In 2012, Mankato embarked on an ambitious restructuring of the bus system, and since then the number of people riding transit has more than doubled. Now, the City of Mankato is producing the region's first transit development plan to identify opportunities for continued improvement in service and operations that meet a wider variety of transit customer needs in the Mankato area. Throughout 2017, the City of Mankato will chart a way forward, documenting recommendations from community stakeholders and technical experts in the Mankato Transit Development Plan.

**We want to know  
about your transit  
needs**

## STUDY AREA

The primary study area includes the cities of Mankato, North Mankato, Skyline, and Eagle Lake. The transit development plan will address connections into Mapleton, Lake Crystal, and potentially other communities.
